

BLADE vs CUBICLES

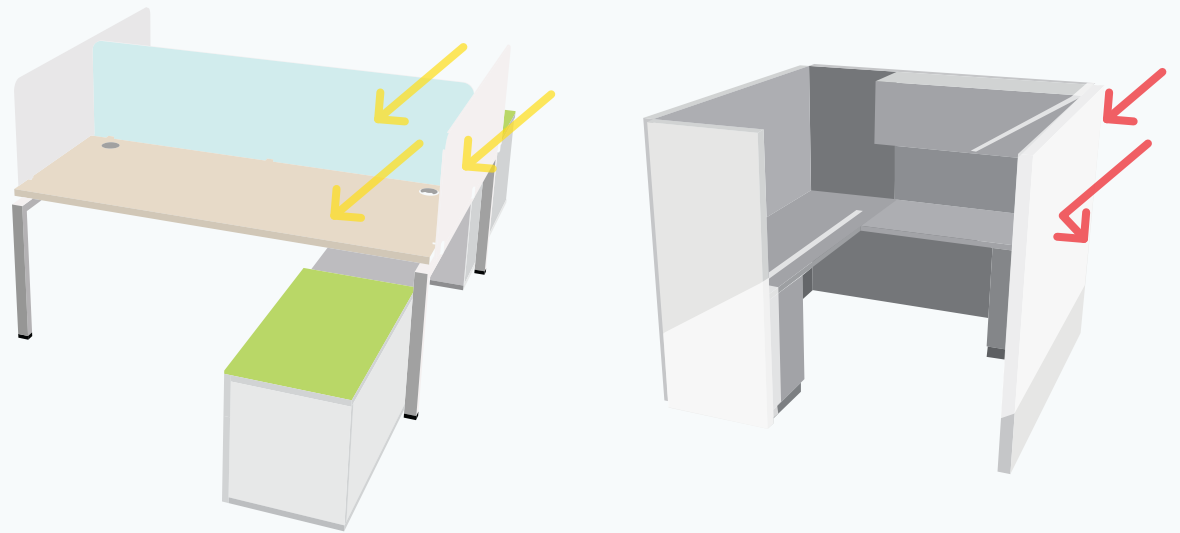

ADVANTAGES

DAYLIGHT

The benefits of buildings illuminated with daylight include:

- Increased Productivity
- Higher Levels of Concentration
- 13% Increase in Short-Term Memory
- Reduced Eye Strain and Stress Levels

BLADE promotes a natural-lit work environment, allowing sunlight to radiate freely.

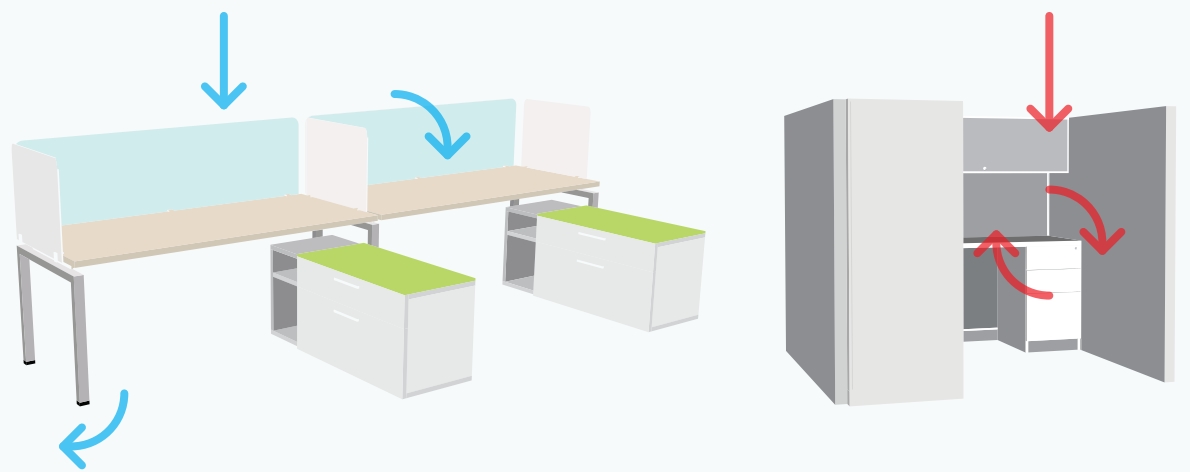

AIRFLOW

Temperature affects productivity. Cubicles placed under a/c vents trap the cool air—freezing the occupant, while others suffer with warmer, more stagnant air.

BLADE Benefits Include:

- More Even Temperature Distribution
- Increased Productivity
- Healthier Workplace

BLADE enables air to flow throughout the office, creating a comfortable workplace.

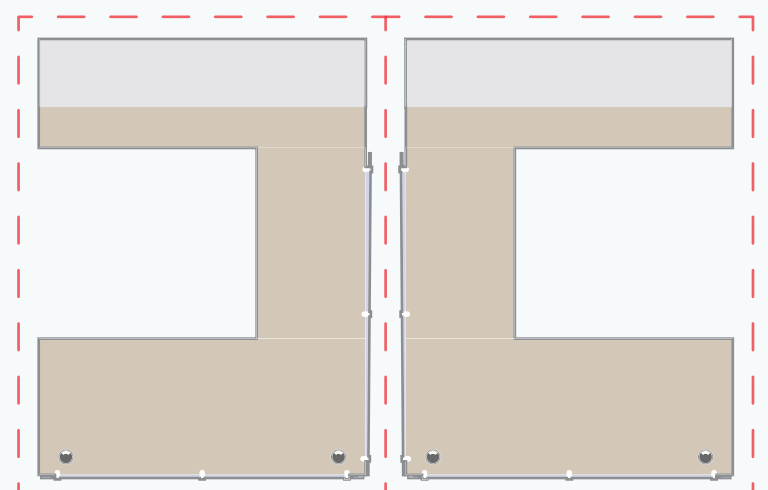

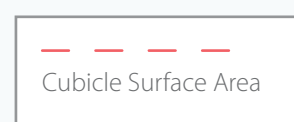

SPACE

A single BLADE configuration saves 8% more space than the traditional cubicle. The average client can save 25% more in real-estate just by switching to BLADE.

Other Benefits Include:

- Cost Savings in Excess of 25%
- More Dynamic Configurations
- Solutions Tailored to Your Company

BLADE utilizes space better than cubicles, allowing for more dynamic configurations.
